

**Does 10 bucks a day
for high-speed
Internet send your
guests out the door?**

Netenant™ Features

- Utilizes existing hotel wiring.
- Provides plug and play access.
- One-time cost for equipment with fixed monthly access cost.
- Dedicated, "always on" access.
- Data Transmission rates up to 30 times the speed of dial-up.
- Installs in less than 30 minutes.

Properties with complimentary high-speed Internet access are going to build customer loyalty and in-turn achieve higher occupancies, increased repeat business, and higher REVPAR. In the not-so-distant future, high-speed Internet will be a requirement for most business travelers, the leaders in this sector will likely gain valuable market share today.

For more information on how Netenant™ can help you attract more tenants call or e-mail us today.

ChicagoNet Netenant™ High Speed Internet Access

**Give your tenants what they want.
Fast, Always On, Affordable Internet Access.**

Power It Up

Power up your building with ChicagoNet's Netenant™ High Speed Internet Access and allow your tenants to connect to the Internet at speeds ranging from 256 Kbs to 10 Mbs. That's 5 - 200 times faster than dial up. Once your building is enabled, tenant companies just Plug-In to the ChicagoNet provided wall jacks to have instant Internet connectivity.

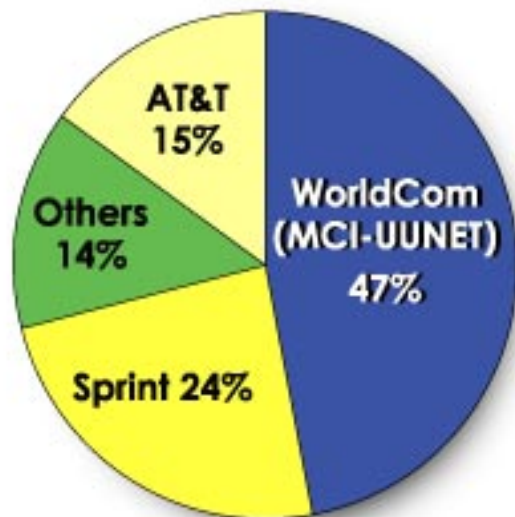

The service options are simple, each tenant only pays for the bandwidth that they need. An unlimited number of users can connect to the Internet and new tenants can be connected in a matter of hours instead of days or weeks. ChicagoNet Netenant™ is a fast, flexible solution for your Tenant Company needs.

Netenant™ Simplicity

One bill. One point of contact. One Company accountability. ChicagoNet's Netenant™ delivers all of the services and connectivity your Tenant Company needs, but, at the same time, does not prevent your client companies from seeking outside services.

ChicagoNet Remote Dial & Remote LAN Access

Keep your company connected. Now you and your employees can access your local area network (LAN) when out of the office, without expensive remote access systems that require ongoing maintenance and support. And you'll work securely, too. ChicagoNet NetenantVPN protects your confidential data using virtual private networking over dial-up connections with industry-standard encryption and encapsulation.

World Class Speed, Reliability, and Security

ChicagoNet brings your company the best in business class Internet connectivity along with comprehensive measures to protect your companies data. ChicagoNet has state of the art technology which implements the latest BGP4 routing protocol to allow true multi-homed operations. ChicagoNet connections, using WorldCom, Sprint and AT&T assure coverage throughout 80% of the Internet without passing through the congested Internet "peering points".
